The diagram shows a 2D hexagonal lattice structure with six colored regions labeled A through F. The regions are arranged as follows:

- Region F (Blue):** A large square on the left. It has a width of 24 and a height of 26. The number 11 is written above its right edge, and 24 is written below its bottom edge.
- Region D (Red):** A rectangle below the right side of F. It has a width of 14 and a height of 12. The number 3 is written below its bottom-left corner, and 11 is written below its bottom-right corner.
- Region C (Red):** A rectangle to the right of D. It has a width of 25 and a height of 12. The number 12 is written to its left, and 12 is written to its right.
- Region E (Green):** A small rectangle above the top-right corner of C. It has a width of 8 and a height of 8. The number 8 is written to its left, and 8 is written to its right.
- Region A (Magenta):** A large rectangle below C and D. It has a width of 24 and a height of 16. The number 16 is written to its left, and 16 is written to its right.
- Region B (Red):** A rectangle to the right of A. It has a width of 6 and a height of 16. The number 6 is written above its top-right corner, and 6 is written below its bottom-right corner.
- Region G (Green):** A small rectangle below the bottom-right corner of A. It has a width of 5 and a height of 5. The number 5 is written to its left, and 5 is written to its right. The number 6 is written below its bottom-right corner.
