RES
2025

The diagram shows a large pink rectangle with a total width of 49 and a total height of 47. It is divided into three regions:

- Region B (Blue):** A rectangle with a width of 25 and a height of 24. Its area is 25 × 24 = 600.
- Region D (Green):** A rectangle with a width of 30 and a height of 14. Its area is 30 × 14 = 420.
- Region C E (Green):** A rectangle with a width of 24 and a height of 4. Its area is 24 × 4 = 96.

The regions are arranged such that the total width is 25 + 24 = 49 and the total height is 24 + 14 + 4 = 47. The regions B, D, and C E are adjacent to each other and to the boundary of the large rectangle.

A small yellow box with the number 2 is located to the left of the large rectangle.
